I still cannot find anything, but from what I understand they should have submitted something because any construction in it of itself would create PM emissions. Let me know if you need anything else.

OK sounds good. Thank you for finding out for me.

From what we had talked about while we were at the Facility it seemed like they hadn't, but I wanted to double check as it will be a part of the enforcement case we have against the Facility.

Thanks again!
Marie

Good Afternoon,

The person I need to talk to is not in today, but what I've learned from permits is that they should have submitted one, but I could not locate one in our database/VFC. Tomorrow I hope this individual is in, and I will let you know for certain if anything was submitted.

Regards,

Andrea
